

LEADERSHIP WITH A HUMAN TOUCH

A PROVEN WORKSHOP THAT BUILDS TEAM COHESION
TO BUILD PERFORMANCE

Research and experience around the world shows that engaged people perform better, stay longer.

Engaged people in turn create engaged, loyal customers who want to tell other people about their positive experiences.

Financial returns and brand reputation then follow.

And the secret to creating engaged teams and organisations? It is through the leaders of the organisation.

Leaders who positively engage their people will achieve higher results.

Leadership with the Human Touch gives a new approach to leadership – one that is positive, appreciative, builds team relationships and builds trust.

It moves away from "Deficit-based leadership", where the focus is on weaknesses and blame, to "Strength-based" leadership, where the emphasis is on building on people's strengths.

This will lead to higher engagement with the team members and a more positive working environment.

2 day duration

For all leaders and managers in an organisations
