

UNDERSTANDING THE GENERATIONS

EMBRACE TODAY'S MULTI-GENERATIONAL CULTURE

Awareness and appreciation of generational diversity.

It is becoming clearer in organisations today that each of the generations think, talk and behave differently from their fellow peers who come from a different generational group.

The ability to relate to other generations can prove to be like wading through muddy waters, as often our own preferences guide our first instincts on how to relate and this may not often be the best strategy to take.

By beginning to understand more about each generation their proclivities and preferences, enhances our ability to connect and create better working relationships. In turn this makes for a positive working environment and culture that appreciates generational diversity and contribution.

TMI offers a complete 'Understanding the Generations' Learning Suite, comprising further half or full day workshops to further develop skills in communicating and working with the generations, and extended specialist skills for Managers leading a multi-generational workforce.

½ or 1 Day course

Discussions & group work

Available as a Learning Suite

TARGET AUDIENCE

This professionally facilitated programme with trainer led presentations, group work, practical discussions and integrated work based situations is designed for everyone in the organisation, irrespective of role or seniority level.
